ICIS is a global source of Independent Commodity Intelligence Services. We connect data, markets and customers to create a comprehensive, trusted view of the global commodities markets, enabling smarter business decisions that optimise the world's resources. For decades, our prices have been the backbone of thousands of transactions around the world.

We are the market leaders for analysing mandatory carbon markets and are now starting a unit focussing on voluntary carbon markets. For this unit we search at least 4

Intern or Working Student: Junior Analyst – Voluntary Carbon Markets (Climate Change Mitigation)

We are looking for multiple student analysts to join our established carbon analytics team in Karlsruhe (Germany).

You will be involved in producing quantitative or qualitative analysis related to Voluntary Carbon Markets and develop tools and solutions that help companies and corporates to better deal with decarbonization and climate solutions.

As a student at ICIS, you will work on your own projects, develop your own ideas and you will contribute significantly to our products. To do so, you will work together with our experienced analyst team to receive support and to have challenging discussions about your project and analysis. Your involvement at the start of our Voluntary Carbon activities offers unique development and career opportunities to you. Within the voluntary carbon market team, you will specialize based on your strengths and interest on different sub-topics, i.e. you will concentrate on either more qualitative (policy) or quantitative/technical (data and modelling) projects.

We offer our students a high degree of flexibility also related to your university schedule – you can choose between a variety of starting dates and length of internship.

Main responsibilities for the team (only some of which will apply to you)

- Identification, downloading, structuring of data on voluntary offsets
- Working with databases
- Coding carbon models (in Python) to forecast future offset production and demand
- Researching, understanding and following regulatory and political trends and issues
- Help quantifying corporates' emissions reduction targets and corresponding demand
- Discussing and implementing product innovations that solve problems for clients
- Contributing you ideas for innovative solutions

Key skills

- Affinity and interest in carbon markets as a contribution to mitigate climate change
- Analytical mindset, critical thinking and creativity
- Python, and/or SQL coding skills for the more quantitative/technical roles
- Good communication skills in English as you will work in an international environment
- Willingness and ability to work in our Karlsruhe office (city center), at least 15 hours/week (working student) or 4-6 months (internship)

We offer

- Opportunities to innovate and shape future climate market solutions
- Student positions at the forefront of voluntary climate markets under the supervision of a very experienced and entrepreneurial carbon market professional
- Active involvement and responsibility from Day 1
- Start-up-like work within an international corporate company
- A vibrant environment working alongside a dynamic and motivated team
- Excellent career opportunities if you stay after your internship
- Fair remuneration for students

At ICIS, we help businesses make strategic decisions, mitigate risk, improve productivity, and capitalise on new opportunities. We make some of the world's most important markets more trusted and predictable by providing data services, thought leadership and decision tools. As a result of our global presence, we deliver targeted connected intelligence to influence thousands of decisions across supply chains every single day. Drawing upon our legacy, we are also in a unique position to leverage big data and analytics as part of RELX, a FTSE 15 data and analytics company with over 30,000 experts across 40 countries. With our intelligence, we shape the world by connecting markets to optimise the world's valuable resources.

ICIS is part of LexisNexis® Risk Solutions Group (RSG), a portfolio of brands that span multiple industries providing customers with innovative technologies, information-based analytics and decision tools and data services that provide market-specific solutions. Approximately 8,700 employees in offices throughout the world support RSG brands by serving customers in more than 180 countries. RSG is part of RELX, a global provider of information and analytics for professional and business customers across industries.

Start date: as soon as possible!

Location: Karlsruhe, Germany
