SMC. Living Strategies.

# In Touch with Top Management.

Siemens Management Consulting (SMC) is the dedicated strategy consultancy for one of the world's most innovative engineering and technology companies.

Our mission is to inspire and transform Siemens businesses worldwide and to launch top talents into senior management. Based in Beijing, Mumbai and Munich, we work with Siemens to pioneer new business initiatives like sustainably powering our planet, shaping the future of mobility or decarbonizing the global economy.

Dr. Horst Kayser (Chief Strategy Officer of Siemens AG) and Felix Ludwig (CEO of Siemens Management Consulting) will provide students from KIT with first-hand insights into Siemens strategy and life at SMC. After the company presentation you'll have the possibility to address your most burning questions directly during our interactive Q&A session. We'll top this live session off with an informal get-together.

Have you ever considered that consulting might be part of your professional future? Take a look behind the scenes and grab your chance to exchange with our consultants on real SMC projects. A personal chat can be the first step in your career at SMC.

We look forward to meeting you!
