DANAHER

Graduate Program for Electronics Engineers

If you're looking to develop your technical and leadership skills, at DanaHER, you can accelerate your career in just 30 months.

In our STEM iDEAS program starting 2021, you'll jump into two year-long projects followed by a 6-month project that's either international or outside your functional/technical area. Along the way, you'll gain access and exposure to the brightest minds on the DanaHER leadership team, have the opportunity to work on meaningful assignments and present your work to technical and operating company leaders. And when you've completed this unique, fast-track program, you'll be ready for a more expansive leadership role at one of our 20+ operating companies.

We are currently looking for an Electronics Engineer to join our Operation Company Leica Biosystems located in Nussloch/Germany.

Responsibilities:

- Independent development and optimization of electrical circuits due to discontinuations, regulatory changes or improvements
- Planning and implementation of qualification tests
- Creation / modification of the design documentation including material master data (DMR / DHF)
- Communication with suppliers on the feasibility of proposed changes
- Coordination of reengineering projects with external partners

Benefits:

- Competitive compensation through a combination of base pay and performance-based pay
- A customized career experience that forges together talent interests, and organizational need
- Mentorship and leadership development opportunities to develop new skills and pave new paths

- Candid and timely feedback pertaining to job performance and progress within the program
- Flexibility to pursue personal goals and to prioritize important family matters
- An inclusive work environment where every person is respected for who they are and the contributions they make
- Opportunities for dialogue with senior leadership about the company's strategic mission, goals and results so that everyone understands their role in Danaher's success

Qualifications:

- Bachelor or Master degree in Electronics Engineering
- Good German and English language skills

Application Process:

- To apply for consideration please send your resume, and cover letter to anja.kaltenbach@danaher.com
